∨Eve

I = Spirit, life force, father Eve = Soul, matter, mother.

∨Eve : Merging of Worlds, Soul portraits in the contemplative process of the divine human being.
is a book developed by the seeker, for the seeker.

In loving thanks, this work is given as a freewill in surrender offering to divine love for the blessing of ascension into wholeness through oneness. Freewill surrender and participation in the humility of divine inspiration expressed in creative thought and intuition, is the vehicle for this work.

The lessons of this message of universal wholeness are being presented as a series of portraits, and poetry using ancient wisdom tools of color, form, harmonics and sacred geometry. Through the use of these tools, ∨Eve speaks to the wholeness of the divine human being on the most primordial and primal levels which ultimately speak to the most conscious of awareness's.

Through examination and surrender, the ego is able get out of the way and hear the call of the soul. As the soul and ego meet, *communion through acceptance, compassion through understanding, co-operation through allowance* meet and merge in the co-creative flow of the Divine Human Being in the One Intention of Being In Love.

I, meaning spirit (life force energy) and Eve, meaning soul (matter), merge to create from the most inner level to the most outer levels of existence. This book is intended to be a guide, a map, for those on the pathway of spiritual enlightenment. This work is a consideration of the passages of the being in life as ego/soul in simplicity of words, forms, color and shape.

May this work bring joy as the light of your path.

Blessings of peace and wholeness,

Willow
